

|          |                                      |           |   |
|----------|--------------------------------------|-----------|---|
| Limbo    | Confusing patch targets              | Greed     | Perfect isolation, 100% coverage            |
| Lust     | Brittle assertions                   | Fraud     | Tests that test nothing                     |
|          | Complex Setup                        | Treachery | Reverse-engineering mocks with the debugger |
|          | Deep/recursive mocks; mocks-in-mocks |           |   |
| Gluttony | Too many mocks or patches            | Heresy    | Mocks that prevent refactoring              |
